Signature of Issuing Official						

Please, note: This inspection only inspects the exterior connection of the electrical service to determine if the exterior connection has been tampered with or damaged. This inspection is required by Georgia Power. This inspection DOES NOT guarantee that the fuse box or any electrical wiring or equipment within the house is up to current code and/or safe for use. It is HIGHLY RECOMMENDED that a State of Georgia certified, professional electrician be contracted to inspect the electrical components inside the house. If it appears that the interior fuse box has been tampered with, damaged or is NOT in good operating condition, it is HIGHLY RECOMMENDED that the electrical system on the inside of the house NOT be engaged and operated PRIOR to a qualified, State of Georgia certified professional electrician inspect the fuse box and other interior electrical components for safety and utility. Please use caution when working with the components of your structures' electrical system.
